Hi Steve - FYI. Jim Haklar of EPA's TSCA program is taking the lead on this, but I wanted to keep you informed. Ed Hannon of NG is coordinating with Jim H regarding whether TSCA would accept NG's proposal for clean up of PCB-contaminated soils from Bethpage Pk.

Thanks Ed. I've been meaning to call you and would like to know your availability over the next couple of days. I don't think we need a conference call; I just want to follow-up from my discussions with HQ.

Subject: Northrop Grumman OU3 Former Settling Ponds Soils

Dear Peter, Jim, and Carol:

During our meeting on May 2nd, you requested PCB soils data and bench scale test results to assist in your review of soil washing as a viable remedy for PCB-contaminated soil at Operable Unit 3 (Former Grumman Settling Ponds) in Bethpage, New York. We are providing the following for your review:

- PCB soil analytical data from field work conducted in 2014 and 2015. We have additional data from the earlier RI/FS stages, which we can provide at your request.
- Figures showing soil boring locations, PCB distribution in soils, and the conceptual remedy.
- Remedial action objectives for soil, as established in the ROD.
- Soil washing bench test results.

Please let us know if it would be helpful to arrange a web-based meeting to describe the PCB soils data and conclusions from the bench test.

Ed Hannon
